DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4 and 13-17 are rejected under 35 U.S.C. 102(a) as being anticipated by Horning.

Horning discloses in figure 1a-4 a wearable holster comprising a main back portion 4, at least one thermally insulated portion 7, a securing means (10a, 10b), a removable liner, (a prepackage gel, col. 7, lines 10-19) and a storage portion (any of the members 7 can be used as a storage portion).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horning in view of Kirschke.

Horning discloses in figures 1-4 a wearable holster, substantially as claimed. However, Horning doesn't positively claim a stone as the heating object. Kirschke teaches in figures 1-6 a holster comprising a heating object that is a stone. It would

have been obvious to one having ordinary skill in the art at the time that the invention was made that the heating object as taught by Kirschke could be placed inside of the insulated portion to provide heat to the body. The stone could be stored in the insulated portion.

Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horning in view of Theodore.

Horning discloses in figures 1-4 a wearable holster, substantially as claimed. However, Horning doesn't disclose the securing means being a belt having an adjustment means and a buckle. Theodore teaches in figure 5 a thoracic sac comprising a securing means that includes a belt 44, an adjustment means (the slider not numbered adjacent to 52b) and a buckle (52a, 52b). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the securing means as taught by Theodore could be substituted for the securing means disclosed by Horning in order to be able to adjust the holster around the user's back.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Murphy discloses a heating belt. Fan discloses an elastic bandage.
